

3 Custom Home Features for 2022 Salt Lake City

Mudroom

Mudrooms are a must-have custom home feature for families of all sizes, newlywed couples, and even individuals. We've all tracked snow, mud, or dirt inside at one time or another, and consequently spent too much time cleaning up the mess. Whether it was your five-year-old son, your spouse, or yourself, the process is never a pretty one. Rather than risk damaging your soft carpet or staining your beautiful hardwood floors, consider adding a customized mudroom to your [custom home in Salt Lake City](#). Mudrooms are typically located right next to a home's entrance through a garage or side door, making them convenient for shoe scraping and hanging items such as coats, jackets, bags, and keys. Mudrooms are also a great way to help your child keep their schoolwork organized and in a suitable position for easy access in the mornings.

Game Room

Game rooms are a fun and favorable addition to all custom homes in Salt Lake City, whether you're a party of one or a family of ten. If your kids struggle to pick up after themselves, leaving trails of toys and game pieces throughout the bathroom, kitchen, and hallways, a game room is a perfect choice for your custom home. Game rooms are a great way to keep all activities (and therefore messes) centralized in one location. If your kids have one large, appealing room to play games, invite friends, and make messes, the rest of your home will stay cleaner (and quieter) because your children will spend more time in that one particular room. If you don't have kids, game rooms as a custom feature for your Salt Lake City home can still be beneficial. Equip your custom game room with a pool table, foosball table, a mini-theater, a card table, and other features to transform your game room into an adult lounge. An adult lounge is a perfect place to spend time with friends and visitors while keeping everyone entertained.

Office

As the worldwide pandemic and the drastic shift to digital services causes more and more companies to work online, you or your spouse may find yourselves employed from home sometime in the future. Rather than propping up a few pillows and working in your bed (as appealing as that sounds) or finding refuge on the living room couch with a cup of coffee sitting precariously on the armrest, consider adding an office to your custom home in Salt Lake City! Your custom office may include anything from a desk, a monitor, and some shelves to a workout machine, a mini-fridge, and a few simple paintings. Your office can be used for work, exercise, meditation, college classes, and just about any other independent activity you can think of.
